PROFILE

Digital experience designer with over 20 years of expertise, specialising in user-centred solutions for sectors like Smart Home, Security, Telecare and IoT. I combine creativity with a strong technical foundation (HTML, CSS) to deliver products that meet user expectations while aligning with strategic business goals. My process is collaborative, research-driven and constantly tested.

EXPERIENCE

Childrin

2025 – Present

UX & Product Designer · Founder · Personal project

🌐 [See live product — childrin.es](https://childrin.es)

- End-to-end design and development of a family-leisure web platform, live in production at childrin.es (129+ places across 5 provinces)
- Product strategy, UX research, information architecture, full design system and design of all screens
- Mobile-first design from the first wireframe; installable as a web app with native behaviour (full screen, no browser bar)
- Built with Astro + Supabase + Cloudflare, with a custom admin panel designed for non-technical users and optimised performance (Core Web Vitals in the green)
- Used AI (Claude, Copilot) as a design and development aid, combined with my own expertise
